Brow Tint [Includes Wax]	\$25

Hair growth should be approximately ¼ inch long but no longer than ½ inch to receive waxing services.

We do not recommend waxing skin treated by Retin-A, Glycolic acid, or sunburned, sensitive skin.

## Facials

### Custom Facial

Beautiful skin begins with proper skin care. Following a complete skin analysis, your facial will be customized especially for you. Each facial combines cleansing, toning, extractions, masque, hydration and protection to restore optimum healthy skin.

### Backial

This luxurious process using our premier products that cleanse, tone, moisturize and balance the often ignored, but oh so important skin on your back.

### Peels

Natural skin cell turnover follows our 28-day biological calendar. The speed of the cell turnover cycle decreases as we age. Collagen and elastin, which comprise a large part of our skin's support structure, also decrease. A chemical peel treatment causes the regeneration of new cells to occur at a faster rate than they would naturally as an adult. Our skin care systems strive to formulate the most result oriented scientifically advanced treatments. The following are the different kinds of peels we offer. After analyzing your skin your esthetician will choose a peel most beneficial for your skin.

- Dehydrated
- Parched skin
- Acne
- Hyperpigmentation
- Anti-Aging
- Detoxifying and Nourishing

### Skin Ceuticals Skin Care

The mission of Skin Ceuticals is to improve skin health. Dedicated to this purpose one simple promise - Provide quality backed by science.

### Glo Minerals - Beauty with a higher purpose.

Our formulations deliver a high-pigment makeup line that covers, corrects and protects.

## Treatments

### Microdermabrasion

This treatment takes exfoliation to the next step. This new modern approach uses both Aluminum Oxide Crystals and Organic Buffing Grains for a highly refined polishing to improve texture, diminish the appearance of fine lines, sunspots and acne scarring. You'll notice results after one treatment and realize the benefits with your youthful glow after a series of treatments.
